# CROPBIOLIFE

### WITHHOLDING PERIOD

 There is no withholding period prior to harvest, graze or fodder or re-entering into treated orchards or any other treated crop. Treated seed can be used for feeding.

## WARNINGS

- · Use only as directed.
- · Avoid eye contact as the undiluted concentrate may cause irritation.
- · Store away from food and feeds.
- Keep out of reach of children, animals and uninformed persons.
- · Store in a cool dry place, above 5°C in original containers.
- Always ensure lids of used containers are tightly closed when not in use.
- Although CROPBIOLIFE® has been extensively tested under a large variety of conditions the registration, holder does not warrant that it will be efficacious under all conditions, because

the action and effect thereof may be affected by factors such as abnormal soil, climatic and storage conditions, quality of dilution water, compatibility with other substances not indicated on the label and the method, time and accuracy of application.

- The registration holder furthermore does not accept responsibility for damage to crops, vegetation, environment or harm to man or animal or for lack of performance of CROPBIOLIFE® concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration.
- · Consult the supplier in the event of any uncertainty.

### PRECAUTIONS

- · Avoid inhaling fumes and spray mist.
- In case of contact with the eyes, rinse immediately with plenty of water for at least 5 minutes.
- Wear protective clothing, rubber gloves and protective safety goggles or glasses in case of prolonged contact with the undiluted concentrate.
- Prevent contamination of food, feed, drinking water and eating utensils with the undiluted concentrate.
- Spray drift containing CROPBIOLIFE® will have no adverse effect on any crops, grazing, dams, open water or animals. Such crops, grazing, dams, open water, etc., will remain safe for human and animal consumption.
- When empty rinse the container three times with a volume of water equal to a minimum of 10% of that of the container.
- · Add the rinsing water to the contents of the spray tank.
- Destroy empty container by perforating and flattening it and never use for any other purpose.

### PRODUCT DESCRIPTION

- CROPBIOLIFE® is a complex of carbon compounds extracted mainly from citrus (bitter orange - Citrus aurantium), palm and coconut oil with an added blend of mild organic fruit grade ingredients (100% natural).
- · Non-toxic and non-corrosive.

# CROPBIOLIFE®

# ACT 36 / 1947 REGISTRATION NAM NF0918 BIOSTIMULANT

### DIRECTIONS FOR USE

### USE ONLY AS DIRECTED

### COMPATIBILITY

- CROPBIOLIFE<sup>®</sup> should not be tank mixed with fungicides, insecticides, growth regulators, surfactants, water soluble foliar nutrients and selective post emergence grass and broad leaf herbicides IF there has been no experience or use of the combination in different crops previously; consult your local supplier.
- Do not apply CROPBIOLIFE<sup>®</sup> and foliar applied macro and / or micro nutrients as tank mixtures to fruit or berries with sensitive skins between set and harvest as fruit finish can be adversely affected, however CROPBIOLIFE<sup>®</sup> and foliar nutrients can be applied alternatively in a program without any adverse effect.

### IMPORTANT

- To improve compatibility and coverage of the seeds, always add WETCIT® (Reg. No: L7440) at 2 ml/litre first to the mixture before mixing with CROPBIOLIFE® and the other seed dressing products.
- Do not combine CROPBIOLIFE<sup>®</sup> with micro nutrient formulations as a seed dressing.

### **MIXING INSTRUCTIONS**

#### SHAKE WELL BEFORE USE

 Always add CROPBIOLIFE<sup>®</sup> first to a half filled spray tank, agitate properly and then add the rest.

#### GROUND APPLICATION

- The volume of CROPBIOLIFE® per hectare is always based on high volume applications. For tree row crops a concentration of 50 mt/100 t water is used when spray volume does not exceed 1000 t/hectare. If high volume applications exceed 1000 t spray mixture/hectare do not apply more than 500 mt CROPBIOLIFE®/hectare.
- See specific recommendations for perennial and annual crops below.

- Do not allow CROPBIOLIFE® mixtures combined with other agrochemicals to stand overnight or for prolonged periods. Always ensure thorough agitating during mixing and spraying.
- Do not spray when rain is expected within 4-6 hours after application.
- Apply CROPBIOLIFE<sup>®</sup> preferably under cool to mild conditions and ensure ambient temperatures do not rise above 25°C within two hours after application.
- Always ensure thorough coverage of all above ground plant parts (also inside the canopy) for optimum performance.

# **DOSAGE RATES**

CROPS	CONCENTRATION/100 ℓ AND/OR (DOSAGE/ha)	REMARKS
Citrus	<b>50 m€ CROPBIOLIFE®</b> per 100 ℓ water 300 - 500 mℓ/ha	<ul> <li>FOR IMPROVED SET, FRUIT SIZE DISTRIBUTION, COLOUR AND THE JUICE VALUES. (MATURITY INDICES):</li> <li>For optimum fruit set commence sprays in the period two to four weeks after bud break. If enhanced fruit set is not needed postpone 1st spray until the 80 - 100% petal drop stage. Apply two further sprays with 28 day intervals irrespective the timing of the 1st spray.</li> <li>If high volume recommendations exceed 1000 <i>l</i> spray mixture/ ha do not apply more than 500 mt CROPBIOLIFE*/ha. If less than 1000 <i>l</i> is applied per ha not apply less than 300 mt CROPBIOLIFE*/ha (non-bearing trees).</li> <li>For non-bearing trees follow the same protocol as for deciduous fruit.</li> </ul>
Deciduous Fruit Apples, pears, plums, apricots, peaches, nectarines, persimmons, tree nuts (Almonds, Macadamia, Pecans, Pistachio, Wall nut, Hazelinut and Cashew nut)	<b>50 m€ CROPBIOLIFE®</b> per 100ℓ water 300 - 500 mℓ/ha	<ul> <li>FOR IMPROVED SET, FRUIT FINISH, FRUIT SIZE, FIRMNESS AND COLOUR (RED APPLE, PEAR AND PLUM VARIETIES) WHERE APPLICABLE:</li> <li>Commence sprays at 50 - 100% blossom followed by two further sprays 28 days apart. If high volume sprays exceed 1000 ℓ spray mixture/ha, do not apply more than 500 mt CROPBIOLIFE®/ha.</li> <li>For varieties with a short growing period (like certain nectarines) do not apply more than 2 sprays from blossom to harvest. A postharvest spray is recommended as the 3rd spray.</li> <li>For non-bearing trees do not apply less than 300 mt CROPBIOLIFE®/ha per spray commencing 21 days after bud break followed by 3 further sprays with 28 day intervals.</li> <li>See compatibility regarding foliar applied nutrients on fruit finish.</li> </ul>
Avocado, Mangoes, and Olives	<b>50 m€ CROPBIOLIFE®</b> per 100 <i>ℓ</i> water 300 - 500 mℓ <i>l</i> ha	<ul> <li>FOR IMPROVED SET AND FRUIT SIZE:</li> <li>Commence sprays two weeks prior to blossom followed by two further sprays 28 days apart.</li> <li>If high volume recommendations exceed 1000 ℓ spray mixture/ ha do not apply more than 500 mℓ CROPBIOLIFE®/ha. If less than 1000 ℓ is applied per ha, do not apply less than 300ml CROPBIOLIFE®/ha (non-bearing trees).</li> <li>For non-bearing trees follow the same protocol as recommended for deciduous fruit.</li> </ul>

CROPS	CONCENTRATION/100 ℓ AND/OR (DOSAGE/ha)	REMARKS
Seed Treatment followed by foliar sprays Wheat, barley, oats, lupines and canola	100 mê CROPBIOLIFE® per ha	<ul> <li>FOR IMPROVED YIELD   Timing:</li> <li>Wheat, barley and oats: Apply 1st spray at 4-6 leaf and if dry periods are expected during the flag leaf to flowering stage, a 2nd spray is recommended.</li> <li>Lupines: Apply 1st foliar spray at the 7-8 leaf stage which coincides normally with the start of the reproductive initiation (primary flower spikes of the main stem).</li> <li>A 2nd spray can be applied 28 days later if plants are under stress (drought, high temperatures).</li> <li>Canola: Apply 1st spray at the rosette to start of stem extension (bolting stage.</li> <li>A 2nd spray can be applied 28 days later if plants are under stress (drought, high temperatures).</li> </ul>
Foliar sprays without seed treatment Wheat, barley, oats, lupines, canola and lucerne	100 - 150 m€ CROPBIOLIFE® per ha	<ul> <li>Apply two foliar sprays at timings recommended for Seed Treatmer followed by foliar sprays above.</li> <li>A 2nd spray should always follow 28 days later irrespective weathe conditions.</li> <li>Use the higher rate when adverse stress conditions such as ver cold or high temperatures are expected.</li> <li>Always ensure proper coverage of foliage.</li> </ul>
Potatoes Table and seed potatoes	250 ml CROPBIOLIFE® per ha	<ul> <li>FOR IMPROVED YIELD AND TUBER SIZE DISTRIBUTION:</li> <li>Apply 1st spray two weeks after emergence followed by 2 furthe sprays with 21 to 28 day intervals.</li> <li>Always ensure good coverage of all foliar parts.</li> </ul>
Onions and Garlic Seedbed and transplanted	SEEDBED 50 m€ CROPBIOLIFE® per 100 { water soil drench TRANSPLANTED 250 m€ CROPBIOLIFE® per ha	<ul> <li>FOR ROOT DEVELOPMENT AND REDUCTION OF TRANSPLANT SHOCK:</li> <li>Apply as a soil drench to seedbeds at the two leaf stage and again 1 days prior to transplanting.</li> <li>If seedbeds were not treated apply 1st spray within a week after transplanting but if seedbed was treated commence 1st spray at 2 days after transplanting and repeat 2 times at 28 day intervals.</li> <li>Always ensure proper coverage of all foliar parts.</li> <li>Add WETCIT® as a wetter at 100 ml/100 l water to improve spreading on waxy leaf surfaces.</li> </ul>

CROPS	CONCENTRATION/100 ℓ AND/OR (DOSAGE/ha)	REMARKS
Tomatoes, peppers, and brinjal (eggplant) Seedling trays and transplanted	SEEDLING TRAYS 50 m€ CROPBIOLIFE® per 100 ℓ water drench solution AFTER TRANSPLANTING 150 - 500 m€ CROPBIOLIFE® per ha	<ul> <li>FOR ROOT DEVELOPMENT AND REDUCTION OF TRANSPLANT SHOCK:</li> <li>Seedling drench:         <ul> <li>Drench seedling trays at least twice during the seedling stage of which the last one should be 14 days prior to transplanting.</li> </ul> </li> <li>TO IMPROVE SET AND YIELD:         <ul> <li>If seedling trays were not drenched commence sprays within one week after transplanting but if drenched, apply 1st spray 14-21 days after transplanting. Apply 2-3 further sprays at 28 day intervals. As plants develop, adapt CROPBIOLIFE® dosage/ha according to recommended high volume applications. When more than 1000 ℓ spray mixture is applied /ha do not apply more than 500 mℓ CROPBIOLIFE®/ha.</li> <li>Add WETCIT® as a wetter at 100 mℓ/100 ℓ water to improve spreading on waxy leaf surfaces.</li> </ul></li></ul>
Cabbage, cauliflower, broccoli, celery, spinach and lettuce	SEEDLING TRAYS 50 m² CROPBIOLIFE® per 100 ℓ water drench solution AFTER TRANSPLANTING 250 m² CROPBIOLIFE® per ha	<ul> <li>TO IMPROVE ROOT DEVELOPMENT AND TRANSPLANTING SHOCK:</li> <li>Seedling drench:         <ul> <li>Drench seedling trays at least twice during the seedling stage of which the last one should be 14 days prior to transplanting.</li> </ul> </li> <li>TO IMPROVE HEAD SIZE AND YIELD:         <ul> <li>If seedling trays were not drenched commence sprays within one week after transplanting but if drenched, apply 1st spray 14-21 days after transplanting. Apply 2 further sprays at 28 day intervals.</li> <li>Add WETCIT<sup>®</sup> at 100 ml/100 l water as a wetter for Improved spreading on waxy leaf surfaces.</li> </ul> </li> </ul>
Cucurbits Pumpkins, watermelons, melons and cucumbers (Open field)	250 mt CROPBIOLIFE® per ha	<ul> <li>FOR IMPROVED SET AND YIELD:</li> <li>Commence sprays 14 days post emergence and repeat 2 times at 28 day intervals.</li> </ul>
Cucumbers (Under cover and trellised)	<b>50 m€ CROPBIOLIFE®</b> per 100 ℓ water	<ul> <li>Start sprays 7 days after transplanting and repeat every 28 days for 2-3 further sprays. Adjust spray volume according to plant growth. Do not apply more than 500 mt/ha.</li> </ul>

CROPS	CONCENTRATION/100 ℓ AND/OR (DOSAGE/ha)	REMARKS
Maize	100 mê CROPBIOLIFE® per ha	<ul> <li>FOR IMPROVED YIELD AND BIOMASS (SILAGE):</li> <li>Apply 1st spray at 4-6 leaf stage followed by a 2nd one 28 to 35 days later (pre tasselling stage).</li> </ul>
Soybeans, sunflowers, groundnuts, green beans and dry beans	100 mê CROPBIOLIFE® per ha	<ul> <li>Apply 1st application at 4-5 leaf stage and a 2nd one 28 days later at the pre flowering stage.</li> <li>Always ensure proper covering of all plant parts.</li> </ul>
